

Chair: A. Oral

## Force Spectroscopy

- P.I-01 *Measurement of lateral tip-sample forces in the attractive regime with picometer resolution in three dimensions using NC-AFM* 79  
M. Z. Baykara, B. J. Albers, T. C. Schwendemann, N. Pilet, U. D. Schwarz
- P.I-02 *3D-Force-Spectroscopy and Dissipation Data of an Organic-Inorganic Interface: PTCDAs on Cu(111) and Ag(111)* 80  
D.-A. Braun, D. Weiner, B. Such, M. Fendrich, R. Moeller, H. Fuchs, A. Schirmeisen
- P.I-03 *Simulation on Atomic Force Microscopy for Dihydride Si(001) Surface* 81  
A. Masago, M. Tsukada
- P.I-04 *NC-AFM observation of Ge(001) surface by improved cantilever with sharp tungsten tip* 82  
Y. Naitoh, Y. Kinoshita, M. Kageshima, Y. Sugawara
- P.I-05 *Simulation and theoretical study of small-amplitude lateral force microscopy - Effect of amplitude on AFM images of Si(111) 7x7 surface* 83  
S. Kawai, N. Sasaki, H. Kawakatsu
- P.I-06 *Automatic procedure for tip apex simulation* 84  
I. Stich, P. Dieska, J. Tobik
- P.I-07 *Direct quantitative measurement of lateral forces at atomic scale on Si(100)(2x1) surface using non-contact Atomic Force Microscopy (nc-AFM)* 85  
O. Unverdi, M. Atabak, H. O. Ozer, A. Oral

## KPFM

- P.I-08 *FM-Kelvin Probe Study of Nanoindentations on KBr(100)* 86  
P. Egberts, T. Filleter, R. Bennewitz
- P.I-09 *Tip-induced reversible potential change of ferrocenylthiol molecules using atomic force microscopy* 87  
T. Ichii, S. Nanjo, K. Murase, H. Sugimura
- P.I-10 *Atomic scale contact potential variations on the Si(111)-7x7 surface detected by amplitude modulation Kelvin probe force microscopy* 88  
S. Kawai, T. Glatzel, A. Baratoff, H.-J. Hug, E. Meyer
- P.I-11 *Lateral Resolution and Potential Sensitivity in Kelvin Probe Force Microscopy: Towards Understanding of the Sub-nanometer Resolution* 89  
F. Krok, K. Sajewicz, J. Konior, M. Goryl, P. Piatkowski, M. Szymonski
- P.I-12 *Coupled Kelvin Force Microscopy and Transport in carbon nanotube field effect transistors* 90  
T. Melin, D. Brunel, H. Diesinger, D. Deresmes
- P.I-13 *Analytical and numerical approaches to the local contact potential difference on (001) ionic surfaces: implications for Kelvin Probe Force Microscopy* 91  
L. Nony, F. Bocquet, C. Loppacher, T. Glatzel

- P.I-14 *Investigations of Pt Clusters on TiO<sub>2</sub>(110) by Kelvin Probe Force Microscopy in a N<sub>2</sub> Gas Environment with an Atmospheric Pressure* 92  
M. Ohta, K. Watanabe, R. Kokawa, N. Oyabu, K. Kobayashi, H. Yamada, M. Abe, S. Morita, M. Hirade, A. Sasahara, M. Tomitori, K. Kimura, H. Onishi, T. Arai
- P.I-15 *High-Resolution Surface Potential Mapping on Operating Organic Field Effect Transistor by FM-KFM* 93  
Y. Onoyama, K. Kobayashi, K. Matsushige, H. Yamada
- P.I-16 *KPM on Pd nanoclusters: work function changes due to gas interaction* 94  
E. Palacios-Lidon, C. Barth, C. R. Henry
- P.I-17 *Nanoscale Strain and Composition Mapping Inside Quantum Dots Using UHV Kelvin Probe force microscopy* 95  
Y. Rosenwaks, S. Shusterman, A. Schwarzman, A. Raizman, Y. Paltiel
- P.I-18 *Kelvin probe force microscopy on locally modified self-assembled monolayers on Si substrates* 96  
H. Sugimura, J. Han, T. Hatanaka, H. Sano, T. Ichii, K. Murase
- P.I-19 *Local Surface Potential Measurements of Co-ferritin nanodot by Kelvin Probe Force Microscopy* 97  
S. Yamamoto, Y. Uraoka

## Manipulation

- P.I-20 *Growth and manipulation of C<sub>60</sub> islands on TiO<sub>2</sub>(110)* 98  
F. Loske, F. Ostendorf, R. Bechstein, M. Reichling, A. Kuehnle
- P.I-21 *Theoretical modelling of the effect of an AFM tip on intra-molecular rotation* 99  
N. Martsinovich, L. Kantorovich

## Insulators

- P.I-22 *Tip effects in dissipation imaging: Challenges for interpretation* 100  
S. Burke, P. Grutter
- P.I-23 *Structure of water films on ionic crystals: The role of surface defects and lattice mismatch.* 101  
M. Cardellach, A. Verdaguer, J. Fraxedas
- P.I-24 *Characterization of the NaCl Suzuki structure by scanning force microscopy* 102  
A. S. Foster, C. Barth, C. Henry
- P.I-25 *Bimodal Imaging on Charged Surfaces* 103  
A. M. Gigler, M. Baumann, R. W. Stark
- P.I-26 *Can the NC-SFM sort out the unresolved questions of the natural materials? The Antigorite, example of a complex mineral* 104  
E. Palacios-Lidon, O. Grauby, C. R. Henry, C. Barth, A. Baronnet
- P.I-27 *Ice on BaF<sub>2</sub>(111) at room temperature: a non-contact scanning force microscopy study.* 105  
A. Verdaguer, M. Cardellach, J. Fraxedas

- P.I-28 *Electric Dipoles of Surface Nano-Structures on Insulating Substrates* 106  
F. Yamada, A. Takagi, E. Mikamo-Satoh, T. Matsumoto, T. Kawai

### Molecules

- P.I-29 *Height measurements on organic ultra-thin films* 107  
C. Albonetti, N. F. Martinez, A. Straub, F. Biscarini, R. Perez, R. Garcia
- P.I-30 *Adsorption and nucleation of PTCDAs molecules on a nanostructured KBr (001) surface* 108  
A. S. Foster, O. H. Pakarinen, J. M. Mativetsky, A. Gulans, S. A. Burke, S. Fostner, P. Grutter
- P.I-31 *Small amplitude FM-AFM imaging of molecules using second flexural resonance mode* 109  
Y. Hosokawa, K. Kobayashi, K. Matsushige, H. Yamada
- P.I-32 *Molecular Deformations and Dissipation in FM-AFM on PTCDAs/Ag(111)* 110  
W. Kaminski, R. Perez
- P.I-33 *Molecular assemblies grown between metallic contacts on insulating surfaces analyzed by nc-AFM and KPFM* 111  
S. Koch, T. Glatzel, L. Zimmerli, E. Meyer
- P.I-34 *Crystallites and Wires of Co-Salene on NaCl(001)* 112  
K. Laemle, S. Fremy, A. Schwarz, R. Wiesendanger
- P.I-35 *Theoretical Modelling of Self-Assembly of Molecular Networks and their interaction with Au(111) surface* 113  
M. Mura, N. Martsinovich, L. Kantorovich
- P.I-36 *Imaging of a single molecule on insulator at room temperature* 114  
B. Such, T. Glatzel, S. Kawai, L. Zimmerli, E. Meyer, C. H. M. Amijs, P. De Mendoza Bonmato, A. M. Echavarren
- P.I-37 *What factors determine SPM imaging features of organic molecules?* 115  
S. Tanaka, T. Kamikado, H. Suzuki
- P.I-38 *Modeling the adsorption and imaging of truxene molecules on the KBr (001) surface* 116  
T. Trevethan, A. Shluger

### Post deadline Contributions I

- P.I-39 *Nano-scale lithography with frequency-modulation atomic force microscopy* 117  
T. Eguchi, M. Hamada, K. Akiyama, Y. Hasegawa
- P.I-40 *Measuring the charge state of an atom by nc-AFM* 118  
L. Gross, P. Liljeroth, J. Repp, F. J. Giessibl, G. Meyer
- P.I-41 *Transparent Scanning Kelvin Probe Force Microscopy* 119  
S. Kitamura, M. Suga, H. Nishiyama, H. Matsushima, K. Suzuki
- P.I-42 *Cyber-infrastructure enabled Virtual Environment for Dynamic Atomic Force Microscopy* 120  
A. Raman, J. T. Melcher

Chair: A. Schwarz

## Oxides

- P.II-01 *Step structures and dislocations on CeO<sub>2</sub>(111)* 123  
M. Reichling, S. Bahr, S. Torbruegge, M. Cranney
- P.II-02 *nc-AFM investigation of the air-exposed MgO(001) surface morphology* 124  
L. Gragnaniello, S. Benedetti, P. Torelli, S. Valeri
- P.II-03 *Atom-resolved AFM studies of the polar MgAl<sub>2</sub>O<sub>4</sub> (001) surface* 125  
M. K. Rasmussen, K. Venkataramani, A. S. Foster, J. V. Lauritsen, F. Besenbacher
- P.II-04 *Atomic scale imaging on Fe<sub>3</sub>O<sub>4</sub>(001) surface studied by Non-contact Atomic Force Microscopy* 126  
T. Mizuno, H. Hosoi, A. Subagyo, K. Sueoka
- P.II-05 *nc-AFM investigations of Cu/a-Al<sub>2</sub>O<sub>3</sub>(0001) model catalyst* 127  
K. Venkataramani, M. C. Christensen, S. Helveg, B. S. Clausen, M. Reichling, F. Besenbacher, J. V. Lauritsen

## Biomolecules & Liquids

- P.II-06 *Measurement of adsorbed liquid films using Dynamic Force Spectroscopy* 128  
J. Abad, J. Colchero
- P.II-07 *Molecular Resolution Imaging of Cholesterol/Lipid Bilayer by Frequency Modulation Atomic Force Microscopy* 129  
H. Asakawa, T. Fukuma
- P.II-08 *Ultra-Low Tapping Amplitude AFM for High Resolution Imaging and Mechanical Mapping in Fluid* 130  
P. De Wolf, N. Traitcheva, Y. Hu, C. Su
- P.II-09 *Force spectroscopy on DNA by FM-AFM* 131  
G. Di Santo, S. Tobenas, J. Adamcik, G. Dietler
- P.II-10 *Theory of Topography and Recognition Imaging by Dynamic Force Microscopy* 132  
M. Luna, M. Fuss, E. Sahagun, M. Koeber, F. Briones, J. J. Saenz
- P.II-11 *The force required to measure internal structure in block copolymers* 133  
D. Martinez-Martin, F. Barroso-Bujans, M. A. Gomez, A. Raman, J. Gomez-Herrero
- P.II-12 *AFM simulation of large vacancy in aqueous environment* 134  
M. Harada, M. Tsukada
- P.II-13 *Development of atomic force microscope with wideband magnetic excitation of cantilever in liquid* 135  
M. Kageshima, T. Chikamoto, T. Ogawa, Y. Naitoh, Y. Sugawara
- P.II-14 *Local Deposition of Liquid Droplets using a Dynamic-Mode AFM Tip* 136  
K. Kaisei, N. Satoh, K. Kobayashi, H. Yamada, K. Matsushige

P.II-15	<i>Dissipation due to adhesion hysteresis: chemical bond rupture and capillary condensation in dynamic AFM</i>	137
	M. Koeber, E. Sahagun, M. Fuss, F. Briones, M. Luna, J. J. Saenz	
P.II-16	<i>About Local Conformation within Conjugated Supramolecular Assemblies by Non-Contact Atomic Force Microscopy</i>	138
	P. Leclere, R. Demadrille, M. Linares, R. Lazzaroni, B. Gravin	
P.II-17	<i>FM-AFM in liquid using high-Q fiber tips</i>	139
	J. LeDue, P. Grutter	
P.II-18	<i>Development of High-speed Phase Modulation AFM in CA mode in Liquid</i>	140
	Y. J. Li, A. Kobayashi, Y. Naitoh, M. Kageshima, Y. Sugawara	
P.II-19	<i>Dynamic Strength of the Interaction between Concanavalin A and Neoglycoconjugates of a-D-Mannosides.</i>	141
	R. Muñoz, N. Briz, J. Valero, B. Ibarlucea, I. Obieta, S. Penades, M. Marradi, O. Martinez-Avila	
P.II-20	<i>Advances in the AFM characterization of silkworm and spider silk fibers</i>	142
	J. Perez-Rigueiro, L. Biancotto, M. Elices, G. R. Plaza, G. V. Guinea	
P.II-21	<i>Organic Films Observations by TF-AFM in Liquid Environment in NC-AFM</i>	143

	J. A. Hedberg, V. Sazonova, C. da Cunha, G. Gervais, M. Hilke, R. Bennewitz, P. Grutter	
P.II-28	<i>Improved characterization of MFM-tips for separating electrostatic and magnetic forces in multiferroics</i>	150
	U. Zerweck-Trogisch, D. Koehler, P. Milde, C. Loppacher, S. Geproegs, S. T. B. Goennenwein, R. Gross, L. M. Eng	
P.II-29	<i>Time-resolved electrostatic force detection by frequency shift mode</i>	151
	T. Matsumoto, T. Kawai	

### New Techniques

- P.II-30 *The mechanical-diode ultrasonic regime: monitoring nanoscale events in the ultrasonic time-scale from the quasi-static cantilever mechanical response* 152  
[M. T. Cuberes](#)
- P.II-31 *Intermodulation Atomic Force Microscopy* 153  
[D. Haviland](#), D. Platz, E. Tholen, C. Hutter, H. Hansson
- P.II-32 *Nanopillar growth of Ge on a Si tip in inert gas under atmospheric pressure* 154  
[M. Hirade](#), Y. Jeong, M. Ohta, K. Watanabe, R. Kokawa, N. Oyabu, K. Kobayashi, H. Yamada, A. Sasahara, T. Arai, M. Tomitori
- P.II-33 *Rapid Multidimensional Data Acquisition in Scanning Probe Microscopy: Applications to Quantitative Dissipation Measurements* 155  
[S. Jesse](#), P. Maksymovych, M. P. Nikiforov, A. Baddorf, R. Proksch, S. V. Kalinin
- P.II-34 *Theory of Multifrequency Atomic Force Microscopy* 156  
[J. R. Lozano](#), R. Garcia
- P.II-35 *Measuring and optimising quality-factors  $Q$  of cantilevers used in dynamic force microscopy* 157  
[J. Luebbe](#), S. Torbruegge, L. Troeger, M. Reichling
- P.II-36 *Significant performance improvement of a commercial dynamic scanning force microscope* 158  
[J. Luebbe](#), S. Torbruegge, L. Troeger, M. Cranney, T. Eguchi, Y. Hasegawa, M. Reichling
- P.II-37 *Decoupled Control of Piezoelectric Tube Actuator Based AFM Scanning Using the MIMO Disturbance Observer* 159  
[S. Necipoglu](#), L. Guvenc
- P.II-38 *Eddy Current Microscopy of Nanostructures in UHV and under ambient conditions.* 160  
[T. Roll](#), M. Meier, M. Schleberger
- P.II-39 *Frequency and amplitude modulation torsional resonance atomic force microscopy* 161  
[R. W. Stark](#), A. Yurtsever, A. M. Gigler
- P.II-40 *XANAM/III X-ray Induced Force Change Image* 162  
[S. Suzuki](#), Y. Koike, K. Kinoshita, Y. Nakagawa, K. Fujikawa, W.-J. Chun, M. Nomura, K. Asakura
- P.II-41 *Experimental study on stabilization of chaotic cantilever oscillation in AM-AFM by time-delayed feedback control* 163  
[K. Yamasue](#), K. Kobayashi, H. Yamada, K. Matsushige, T. Hikihara

### Post deadline Contributions II

- P.II-42 *Understanding FM-AFM images on Ceria with ab initio simulations* 164  
[K. Kosmider](#), R. Perez
